

Aligned to
Perfection,
Quality and
Efficiency

J.V. Group of Companies was founded in the year 1975 by Sri. V. Palanisami. Combining the positive attributes of a family-owned company with a future-relevant and forward-thinking plan, the company had successfully forayed into the textile space. Within a short span of time, the company created an indelible impact in the textile sector with an impressive array of innovative and quality outcomes.

Our Founder, Mr. V. Palanisami's vision combined with his enterprising efforts have allowed us to grow from humble beginnings and rise to the successful stature that we are today.

Today, we can proudly state that J.V Group of Companies is a recognised entity with a trusted name and legacy as a composite standalone manufacturing unit.

OUR PROFILE

Our expertise in textiles comes from each group companies:

Jayavarma Textiles P Ltd, J.V Tapes, Jayavarma Knitters, J.V. Overseas Exports, J.V. Dyeing & Printing, JV Public Welfare Trust & VP Green Energy P Ltd.

A woman in a blue uniform and a blue face mask is working in a textile factory. She is standing in front of a large spinning machine with many spindles. The machine has black frames and green caps. The background is slightly blurred, showing more of the factory environment.

Trusted Name
and Legacy as a
Composite Standalone
Manufacturing Unit.

capacity of
1,35,000 spindles

EQUIPMENT & TECHNOLOGY

KNITTING

This division is equipped with high-speed automatic circular knitting machines with a manufacturing capacity of 3650MT. These machines can manufacture fabrics of various diameters (9 dia to 34 dia) and designs to meet customer requirements. It houses imported machinery from Mayer & Cie, Pai Lung.

SPINNING

Jayavarma Textiles (P) Ltd – The Company has a combined capacity of 135000 spindles spread across two units. They produce approximately 40 MT of cotton yarn per day of counts ranging from 30s to 80s. The third unit Manchester Textile Private Limited, has a capacity of 35000 spindles.

Blowroom – LMWANDTRUTZSCHLER

Carding – LMW AND TRUTZSCHLER

Comber Preparatory and Comber RIETER from SWITZERLAND

Draw Frames – RIETER from Switzerland and LMW

Simplex – LMW

Ring Frame LR60A – LMW

Auto Coner – MURATEC From Japan and

Schafhorst338 from Germany

Clearer USTER Quantum4 – From Switzerland

Sieger Yarn Conditioning Machine

Uster AFIS Testing Machine

Suessen Compact Machine

PRODUCT PORTFOLIO

Value Added Products : Quality without Compromise

Our expertise in offering consistently high-quality range of products has established us in a prominent place in the global map of quality textile solutions. Sustainability has always been a key factor in driving our strategic decisions and core business areas.

We embrace change and constant reinvention of our technology and innovation to explore new avenues in the industry to provide maximum choice for our stakeholders and customers. Customers, keeping prompt and reliable service with quality and focus as our constants.

As exclusive manufacturers of 100% cotton yarn, we are proud to announce that we also supply the following types of yarn which are of the best quality and competitive price.

HOSIERY

- Count Range - NE 16/1 to NE 60/1
- Quality Available - Combed, Combed Compact , Combed Compact BCI

WEAVING

- NE 30/1 to NE 80/1
- Quality Available - Combed, Combed Compact, Combed Compact BCI
- Karded GL Yarn

Single & Double Yarn in both Hosiery & Weaving

Ring Doubling & TFO Yarn

Slub Yarn

Compact Yarn in both Hosiery & in Weaving

Z Twist Yarn

BCI in Hosiery & Weaving counts 30s -80s.

Production / month
2.85 Crore Mtrs

J.V TAPES

Since 1988, the company has been singularly supplying 40% of elastic requirements in Tirupur. Today, it has evolved successfully into one of the most preferred suppliers for various brands in Europe and the USA.

Oeko-TEX Standard 100 Product Class I certification is a validation that its products are free from any harmful substances.

- Imported machines from Jakob Mueller, AG Frick, Switzerland — 8 bar machines with electronic control & 3 bar high-speed machines with electronic control.

WOVEN & KNITTED ELASTIC

- Imported machines from Jakob Muller, AG Frick, Switzerland - 384 hooks, 192 Hooks, 128 hooks for Jacquard.
- Imported high-speed and quality machines for plain, matt, satin and rigid tapes
- Covering machines with electronic control
- Imported Yarn Warping and Rubber Warping machines
- Tape finishing machines using gas

OUR PROWESS

Monthly production capacity:

Our assembly of high-end equipment allows us to create masterpieces that match our enthusiasm to always achieve perfection in whatever we do. Our support team comprising of skilled craftsmen, specialized sewing technologies, and state-of-the-art techniques pave the way for a perfectly finished product which surpasses all the parameters of quality and durability.

Crochet plain and frill	1.5 Crore Mtrs
Crochet fancy frill elastics	50 Lakh Mtrs
Crochet spandex laces	10 Lakh Mtrs
Woven plain elastic	10 Lakh Mtrs
Woven jacquard elastic	25 Lakh Mtrs
Tape dyeing and finishing	20 Lakh Mtrs
Satin and MATT Elastics	20 Lakh Mtrs
Total production per month	2.85 Crore Mtrs

Production
2.85 core
meters per month

GARMENTING

The unit has installed the latest automated cutting machines from Investronica Sistemas SA, now part of the Lectra SA – France and Juki, Pegasus, Siruba sewing machines.

J.V. DYEING & PRINTING

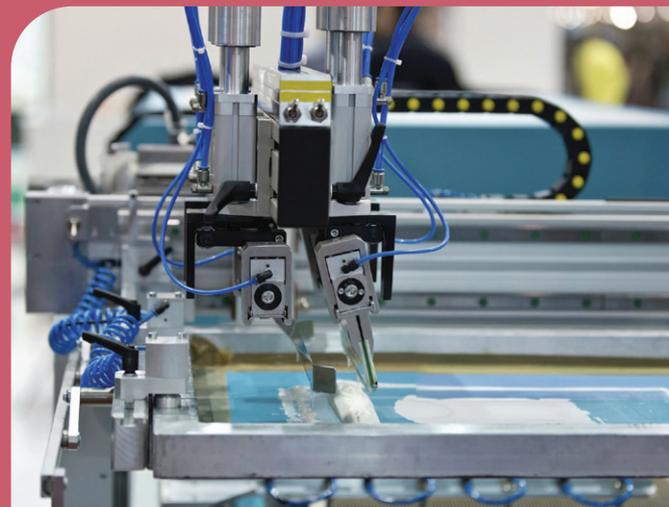

The processing division is equipped with the latest soft flow dyeing machines with a capacity of 4 tonnes/day. The high-end soft flow machines with drier from Essico, Italy is also available, capable of churning out 4 tonnes on a daily basis.

For printing, a machine printing facility is available. Nearly 5000 pieces/per day are printed using multi-color prints.

TAPE DYEING

SB Breitenbach from Switzerland

Our continuous dyeing & finishing machine is suitable for dyeing nylon and polyester elastics and non-elastics tapes.

Multi color prints
5000 Pieces/day

Dyeing capacity
20 Lakhs Mtrs/Month

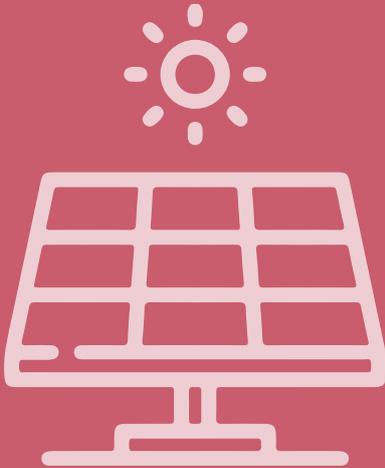

90% of power is derived from green power sources

GREEN ENERGY

SOLAR ENERGY

We follow a path set to create value for society. Our success is measured by how far we have contributed towards sustainability and future-proofing our companies by implementing ecologically conscious initiatives. Solar power and windmill power have been part of our green initiatives through VP Green Energy (P)Ltd.

Our Solar Power generates 13 MW. 90% of our total power is procured from Green Power sources.

WIND ENERGY

Presently, we have Green power generation through 16 windmills across Tamilnadu that can generate 15 MW to support our power requirements through captive consumption.

We have several green initiatives and energy-saving modules in place:

- Water minimizing techniques
- Low impact dyes
- Optimized water reuse
- Recover heat from hot water processes
- Maintenance of leaks/meters/steam traps
- Improved insulation

16 Windmills
across Tamilnadu
